## EXTERNAL WORKSHOPS FOR TEACHERS

**“Law of Attraction”  
by Mohit Tahiliani.**  
Law of Attraction is the most powerful law in the Universe. Its simply says that you attract into your life whatever you think about.

**Activity Based Learning  
by Sonia Relia.**  
Activity based approach is an effective method which creates a visible improvement in a child’s understanding, learning and psychology.

**Identification of gifted and special needs children  
by Lata Iyer.**  
It is important for us to understand their different ways of learning as well managing their behaviour too.

## IN HOUSE TEACHER TRAINING SESSIONS

### Power of Questioning by Chhabra Ma’am.

Questioning helps us to discover all kind of useful information that can help us achieve our goals. Chhabra Ma’am guided teachers that by asking right questions to ourselves, we get the answers which helps us to move forward in our life.

### Program of Inquiry by Shobhna Ma’am, Kruti Ma’am and Avani Ma’am.

POI is purposeful, structured learning that promotes meaning, understanding and challenges children to engage with significant ideas.

### Fun Based Learning by Ulupi Ma’am and Shobhana Ma’am.

Which creates a visible improvement in child’s understanding, learning and psychology. Positive fun based learning memories help retains concepts better.

### Storytelling by Minku Ma’am and Neha Ma’am.

Stories are very important part of our life. The session on story telling techniques was conducted for teachers to ensure effective story telling session in the classroom.

## ‘PLAY’ ESSENTIAL FOR CHILDREN

These days in our busy lives we have forgotten the importance of play. We have made our children slaves to gadgets like mobiles, I-pads, video games etc. Wherein in earlier days children used to go out for free play which helped them to develop their physic. And not only physic, play is beneficial for their cognitive, social and emotional well being. Play allows children to use their creativity and enhance their imagination skills. Thus, play is essential for healthy brain development.

Play allows children to create and explore a world they can master and conquer their fears while indulging in the role plays with peers. Even academic learning also take place along with play. Its not always to sit beside children and make them study. Learning takes place when we are communicating with children while playing. lay offers an ideal opportunities for parents to engage fully with their children. We should create more opportunities for children wherein they can play, participate, communicate, learn and explore new things.

## IMPORTANCE OF EDUCATION

Education is must for both men and women equally as both together make a healthy and educated society. It is an essential tool for getting bright future as well as plays a most important role in the development and progress of the country. Educated people become the base of the developed country. So, proper education makes the bright future of both, the individual and the country. It is only educated leaders who build the nation and lead it to the height of success and progress. Education makes people perfect and noble. Good education gives many purposes to the life such as enhancement of the personal advancement, increase social awareness, economical progress, success to the nation, set appropriate goals of life and gives solutions to solve environment problems. Now-a-days, education has become very simple and easy because of the implementation of distance learning programmes. Our modern education system is fully capable to remove the social issues of illiteracy and inequality among people of different races, religions and caste. Education develops the people’s minds to a great level and helps removing all the differences in the society. It helps us to become a good learner and to understand every aspect of life. It provides ability to understand all the human rights, social rights, duties and responsibilities towards our country.
